SPECIALIZED CLINICAL ENCOUNTER & URGENT RESPIRATORY SLIP (OPD-PULM)

Dr. Rajesh Patel, MBBS, MD (Med)
Consultant Physician & Medical Officer
Reg. No: **NMC-2018-88412** (National Medical Commission)
Mawlynnong SDH & Rural Health Division

Date: 30 October 2026
Time: Urgent Chest Consultation
Clinical Priority: **HIGH / URGENT**
Prescription ID: **RX-CHEST-881**

Patient: Citizen Encounter | **Age/Sex:** Adult / Male | **Risk:** Chronic Chain Smoker | **Ref: PT-RESP-770**
BP: 136/86 mmHg | **Pulse Rate:** 88 bpm | **Resp. Rate:** 22 /min | **SpO_2:** 95% (Room Air)

CHIEF COMPLAINTS & CLINICAL ASSESSMENT:

- **Presenting Symptoms:** Severe paroxysmal coughing for several days; acute sharp pleuritic chest pain on coughing and deep inhalation.
- **Significant Risk Profile:** Chain smoking since age 16 (> 15 pack-years). Heavy bronchial epithelial irritation, compromised mucociliary clearance.
- **Auscultation / Examination:** Bilateral coarse rhonchi, prolonged expiratory phase, focal lower anterior pleuritic chest wall tenderness.
- **Provisional Diagnosis: Severe Acute Tracheobronchitis with Pleuritic Chest Pain**; Suspected underlying Chronic Obstructive Pulmonary Disease (COPD) stage I/II. *Must rule out secondary spontaneous pneumothorax and pneumonia.*

STAT DIAGNOSTIC INVESTIGATIONS ORDERED:

1. **Chest X-Ray (PA View):** URGENT – Rule out pneumothorax, focal consolidation/pneumonia, or space-occupying lesion.
2. **12-Lead ECG:** Rule out acute coronary syndrome / myocardial ischemia in a heavy chronic smoker.
3. **Complete Blood Count (CBC) & CRP:** Check leukocytosis, acute infection markers.
4. **Sputum Cytology & Gram Stain/AFB:** If expectoration is purulent or discolored.

Rx

Affordable PMBJP Jan Aushadhi Formulations Specified

#	Prescribed Formulation	Strength	Timings	Instructions & Duration
1	**Levosalbutamol + Ipratropium** *(Duolin Inhaler MDI + Spacer)*	50/20 mcg	**TID** (8am/1pm/9pm)	2 puffs 3 times daily. Relieves bronchial spasm × 7 Days.
2	**Tab. Amoxicillin + Clavulanate** *(PMBJP Generic / Augmentin eq.)*	625 mg	**BD** (Post-food)	1 tab twice daily after meals for bacterial infection × 5 Days.
3	**Syp. Ambroxol + Levocetirizine** *(Mucolytic Expectorant)*	100 ml	**BD** (Morning/Night)	10 ml twice daily. Thins mucus and calms spasms × 5 Days.
4	**Tab. Aceclofenac + Paracetamol** *(Anti-inflammatory Analgesic)*	100/325 mg	**SOS / BD** (Post-food)	For acute pleuritic chest wall pain. Take strictly after food.

[CRITICAL RED FLAGS – CALL 112 / VISIT ER IMMEDIATELY]:

- If you develop **hemoptysis** (coughing up blood), sudden severe breathlessness, blueness of lips/nails, or crushing central radiating chest pain, proceed to the nearest emergency department without delay.
- **STRICT TOBACCO CESSATION:** Stop all smoking immediately. Smoke paralyzes airway cilia and drastically worsens acute lung injury.

JAN AUSHADHI FAIR PRICE NOTICE:

Collect from Pradhan Mantri Jan Aushadhi Kendra #7402. Estimated generic total: Rs. 68.50 vs Branded Rs. 395.00 (Savings: 82%). Verified non-expired stock.
